REGIONAL MULTIPLIERS:

A User Handbook for the Regional Input-Output Modeling System (RIMS II)

May 1986

U.S. DEPARTMENT OF COMMERCE

Malcolm Baldrige, *Secretary*

D. Bruce Merrifield, *Acting Under Secretary for Economic Affairs*

BUREAU OF ECONOMIC ANALYSIS

Allan H. Young, *Director*

Carol S. Carson, *Deputy Director*

ACKNOWLEDGMENTS

This handbook of regional output, earnings, and employment multipliers was prepared by Richard M. Beemiller, Zoe O. Ambargis, and Howard L. Friedenberg under the general guidance of Daniel H. Garnick, Associate Director for Regional Economics of the Bureau of Economic Analysis (BEA) and under the direction of Hugh W. Knox, Chief of the Regional Economic Analysis Division (READ).

READ has a continuing research program to develop improved techniques for analyzing the regional economic impacts of projects and programs. In the early 1970's, READ developed a method known as the Regional Industrial Multiplier System (RIMS) for estimating regional input-output multipliers. The RIMS methodology was based on the work of Daniel H. Garnick and Ronald L. Drake. Further development, under the guidance of A. Ray Grimes and based on the work of Joseph V. Cartwright and Richard M. Beemiller, resulted in an enhanced method known as the Regional Input-Output Modeling System (RIMS II). The multipliers in this handbook were produced with RIMS II.

In recognition of the potential usefulness of RIMS II multipliers for developing strategies for State and local area economic development, as well as for analyzing the impacts of economic development projects, the Economic Development Administration (EDA) of the U.S. Department of Commerce sponsored the publication of this handbook for RIMS II users.

Arthur A. Morton and Mark A. Planting advised on the use of the BEA national input-output table. Carol E. Evans and Kathy A. Albetski provided estimates of regional wages and salaries. Tavawya R. Batts typed the handbook. Leland L. Scott, Karin L. Duggan, Sybella W. G'Schwend, and James M. Younger helped prepare the handbook for publication. Beverly Milkman and David Geddes, both of EDA, and Norman Glickman and Douglas Woodward, both of the University of Texas, supported the publication effort.

I. Introduction

Effective planning for public- and private-sector projects and programs at the State and local area level requires systematic analysis of the economic impacts of the projects and programs on affected regions. Systematic analysis of economic impacts, in turn, must take into account interindustry relationships within regions because those relationships in large part determine regional responses to project and program changes. Thus, regional input-output (I-O) multipliers, which account for interindustry relationships within regions, are useful tools for regional economic impact analysis.

In the mid-1970's, the Bureau of Economic Analysis (BEA) completed development of a method for estimating regional I-O multipliers known as RIMS (Regional Industrial Multiplier System), which was based on the work of Garnick and Drake./1/ More recently, BEA completed an enhancement of RIMS known as RIMS II (Regional Input-Output Modeling System)./2/

RIMS II is based on an accounting framework called an I-O table. An I-O table shows, for each industry, industrial distributions of inputs purchased and outputs sold. A typical I-O table in RIMS II derives mainly from two data sources: (1) BEA's national I-O table, which shows the input and output structure of more than 500 U.S. industries, and (2) BEA's four-digit Standard Industrial Classification (SIC) county wage-and-salary data, which can be used to adjust the national I-O table to show a region's industrial structure and trading patterns./3/

1. See Daniel H. Garnick, "Differential Regional Multiplier Models," Journal of Regional Science 10 (February 1970): 35-47; and Ronald L. Drake, "A Short-Cut to Estimates of Regional Input-Output Multipliers," International Regional Science Review 1 (Fall 1976): 1-17.

2. See U.S. Department of Commerce, Bureau of Economic Analysis, Regional Input-Output Modeling System (RIMS II): Estimation, Evaluation, and Application of a Disaggregated Regional Impact Model (Washington, DC: U.S. Government Printing Office, 1981). Available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161; order no. PB-82-168-865; price \$16.

3. See U.S. Department of Commerce, Bureau of Economic Analysis, The Detailed Input-Output Structure of the U.S. Economy, 1977, Volume II (Washington, DC: U.S. Government Printing Office, 1984); and U.S. Department of Commerce, Bureau of Economic Analysis, State Personal Income: Estimates for 1929-82 and a Statement of Sources and Methods (Washington, DC: U.S. Government Printing Office, 1984).

The main data sources for RIMS II permit economic impacts to be estimated for any region composed of one or more counties and for any industry in the national I-O table. This handbook presents multipliers for States. The accessibility of the main data sources for RIMS II keeps the cost of estimating regional multipliers relatively low. Moreover, empirical tests show that estimates based on relatively expensive surveys and RIMS II-based estimates are similar in magnitude./4/

RIMS II can be used to estimate the impacts of project and program expenditures by industry on regional output (gross receipts or sales), earnings (the sum of wages and salaries, proprietors' income, and other labor income, less employer contributions to private pension and welfare funds), and employment. In the public sector, Federal, State, and local planners and analysts use RIMS II to estimate regional impacts. For example, the Department of Defense (DOD) uses RIMS II to estimate the regional impacts of changes in defense expenditures; and the New York State Energy Office uses RIMS II to estimate the regional impacts of energy policies, ranging from the construction of facilities to energy conservation. Private-sector analysts, consultants, and economic development practitioners use RIMS II to estimate the regional impacts of a variety of projects, ranging from offshore drilling to the construction of transportation facilities.

Effective use of I-O multipliers from RIMS II requires (1) proper interpretation of the I-O relationships and (2) information from planners and analysts on the geographic and industrial patterns of the project or program expenditures under study. Chapter II of this handbook discusses what the I-O multipliers mean, using nontechnical language and simplified accounting. Chapter III discusses the expenditures information that users of RIMS II must provide. Chapter IV contains three hypothetical case studies that illustrate the effective use of the multipliers. The studies focus on estimating the regional economic impacts of (1) building a factory and operating it, (2) increasing expenditures by tourists, and (3) shutting down a military base. Chapter V contains a RIMS II reading list.

Two series (A-1 and A-2) of tables of I-O multipliers are available from RIMS II; series A-1 is for detailed industries, and series A-2 is for industry aggregations. Each series consists of tables of I-O multipliers for output (A-1.1 and A-2.1), earnings (A-1.2 and A-2.2), and employment (A-1.3 and A-2.3), and a summary of output, earnings, and employment (A-1.4 and A-2.4). Samples of tables A-1.1, A-2.1, A-2.2, A-2.3, and A-2.4 for the State of Louisiana are in appendix A. Summary tables, corresponding to table A-2.4, for all 50 States plus the District of Columbia are in appendix B. Planners and analysts can use the tables to estimate the impacts of project or program expenditures on output, earnings, and employment. A list of the detailed industries in series A-1 is in appendix C, and a list of the industry aggregations in series A-2 is in appendix D.

4. See U.S. Department of Commerce, Regional Input-Output Modeling System (RIMS II), chapter 5.

II. Output, Earnings, and Employment Multipliers From RIMS II

To help planners and analysts estimate the impacts of project and program expenditures by industry on regional output, earnings, and employment, BEA makes available from RIMS II a set of tables of I-O multipliers (see appendix A). This chapter briefly explains the meaning of the I-O multipliers, starting with an explanation of direct requirements coefficients.^{1/}

Direct Requirements Coefficients

Direct requirements coefficients for a given industry in a region show the inputs of goods and services from the region's industries that the given industry requires to produce a dollar of output. Table II.1 shows direct requirements coefficients for a hypothetical region having five industries, including households.^{2/} (The data in this table and succeeding tables are for illustrative purposes only.) Column 1, for example, shows that to produce a dollar of output, industry 1 requires (1) 6 cents of inputs from regional firms in the same industry, (2) 12 cents, 8 cents, and 3 cents of inputs, respectively, from industries 2 through 4, and (3) 18 cents of labor inputs from households.

Direct requirements coefficients for industry 1 can be viewed as estimates of the dollar changes in output, for each additional dollar of output of industry 1, that occur in regional industries from which industry 1 purchases inputs. These changes typically are called first-round, or direct, changes in output. Per dollar of output of industry 1, direct changes in output total 47 cents (the sum of the entries in column 1).

1. More comprehensive discussions of I-O multipliers can be found in: William H. Miernyk, The Elements of Input-Output Analysis (New York: Random House, 1965); Ronald E. Miller and Peter D. Blair, Input-Output Analysis: Foundations and Extensions (Englewood Cliffs, New Jersey: Prentice-Hall, 1985); Harry W. Richardson, Input-Output and Regional Economics (New York: John Wiley and Sons, 1972); and W.A. Schaffer, ed., On the Use of Input-Output Models for Regional Planning, Vol. 1 of Studies in Applied Regional Science (Leiden, the Netherlands: Martinus Nijhoff, 1976).

2. Regional I-O multipliers account more fully for the regional economic repercussions of project and program expenditures if households are included as an industry. For more information, see the references in the preceding footnote.

**Table II.1.--Industry-by-Industry Direct Requirements
for a Hypothetical Region**

[Direct requirements from regional industries per dollar
of industry output]

	Purchasing industry				
	1	2	3	4	Households
1.....	0.06	0.15	0.06	0.08	0.08
2.....	.12	.02	.10	.03	.10
3.....	.08	.08	.09	.02	.12
4.....	.03	0	.04	.06	.11
Households.....	.18	.23	.13	.10	.06

NOTE.--Each entry represents the input required directly from the row industry for each dollar of output of the column industry.

Total Requirements Coefficients

Compared with direct requirements coefficients, total requirements coefficients for a given industry in a region account more fully for the regional economic repercussions of producing a dollar of output of the given industry. Total requirements coefficients, which are expressed per dollar of output delivered to final demand (that is, to ultimate purchasers, such as consumers outside the region), reflect (1) the initial dollar of final demand for the output of the given industry, (2) direct requirements coefficients (see above), and (3) indirect requirements coefficients. Indirect requirements coefficients for a given industry in a region reflect (1) the regional production required to produce the given industry's direct requirements and (2) the regional production required to meet consumer demand generated by payments from the given industry to households for their labor inputs.

Table II.2 shows total requirements coefficients for the industries from table II.1./3/ Column 1 shows, for example, that to deliver a dollar of output to final demand, industry 1 requires, both directly and indirectly, (1) \$1.14 of output from regional firms in the same industry (the initial dollar of final demand for the output of industry 1, plus an additional 14 cents of output) and (2) 19 cents, 16 cents, and 8 cents of output, respectively, from industries 2 through 4. The output that industry 1 requires from itself and from industries 2 through 4 includes earnings paid to households employed in industries 1

3. The mathematical derivation of a table of total requirements coefficients from a table of direct requirements coefficients is in U.S. Department of Commerce, Regional Input-Output Modeling System (RIMS II), chapter 4.

**Table II.2.--Industry-by-Industry Total Requirements
for a Hypothetical Region**

[Total requirements, direct and indirect, from regional industries
per dollar of output delivered to final demand]

	Purchasing industry				Households
	1	2	3	4	
1.....	1.14	0.22	0.13	0.12	0.15
2.....	.19	1.10	.16	.07	.16
3.....	.16	.16	1.16	.06	.19
4.....	.08	.05	.08	1.09	.15
Households.....	.29	.34	.23	.17	1.17
Total/1/.....	1.57	1.53	1.53	1.34	.65

1. Excludes entries in households row.

NOTE.--Each entry represents the output required, directly and indirectly, from the row industry for each dollar of output delivered to final demand by the column industry.

through 4. The fifth entry in column 1 is a summation of earnings paid to households; it shows that to deliver a dollar of output to final demand, industry 1 requires, both directly and indirectly, 29 cents of labor from households employed in industries 1 through 4.

Total requirements coefficients for industry 1 can be viewed as estimates of the total (direct and indirect) changes in output that occur in the region's industries for each additional dollar of output of industry 1 delivered to final demand. Because they are dollar multiples of the initial dollar spent for the output of industry 1, total changes in output often are called output multipliers. For industry 1, the total (all-industry) output multiplier is \$1.57 (the sum of the first four entries in column 1).

Appendix A contains sample tables (A-1.1 and A-2.1) of output multipliers available from RIMS II for Louisiana. The entries in table A-1.1 are the dollar changes in output that occur in 39 row industries per dollar of output delivered to final demand by 531 column industries. (Appendix C identifies the 531 industries.) The entries in table A-2.1, which are aggregations of the entries in table A-1.1, are the dollar changes in output that occur in 39 row industries per dollar of output delivered to final demand by the same 39 column industries. (Appendix D shows the distribution of the 531 industries among the 39 industry aggregations.)

Earnings Multipliers

Earnings multipliers for a given industry in a region show the earnings that the given industry pays, both directly and indirectly, to households employed in regional industries to deliver a dollar of output to final demand. Table II.3 shows earnings multipliers for the industries from tables II.1 and II.2. Column 1 shows, for example, that in order for industry 1 to deliver a dollar of output to final demand, regional firms must pay both directly and indirectly (1) 20 cents of earnings to households employed in the same industry, (2) 4 cents, 2 cents, and 1 cent of earnings, respectively, to households employed in industries 2 through 4, and (3) 2 cents of earnings to household employees./4/

**Table II.3.--Industry-by-Industry Earnings Multipliers
for a Hypothetical Region**

[Earnings, direct and indirect, per dollar of output delivered
to final demand]

	Purchasing industry				
	1	2	3	4	Households
1.....	0.20	0.04	0.02	0.02	0.03
2.....	.04	.25	.04	.02	.04
3.....	.02	.02	.15	.01	.02
4.....	.01	.01	.01	.11	.02
Households.....	.02	.02	.01	.01	.06
Total.....	.29	.34	.23	.17	.17

NOTE.--Each entry represents the earnings paid, directly and indirectly, to the households employed by the row industry for each dollar of output delivered to final demand by the column industry.

Earnings multipliers for industry 1 can be viewed as estimates of the total (direct and indirect) dollar changes in earnings that occur in households employed by regional industries for each additional dollar of output of industry 1 delivered to final demand. For industry 1, the total (all-industry) earnings multiplier is 29 cents (the sum of the entries in column 1)./5/

Appendix A contains a sample table (A-2.2) of earnings multipliers available from RIMS II for Louisiana. The entries in table A-2.2 are the changes in earnings that occur in the households employed by 39 row industries

4. Each column of table II.3 is derived by multiplying, in succession, each column entry in table II.2 by each entry in the households row of table II.1.

5. This total corresponds to the households entry in column 1 of table II.2.

per dollar of output delivered to final demand by the same 39 column industries. A similar table (A-1.2, not shown), with entries showing the changes in earnings that occur in the households employed by 39 row industries per dollar of output delivered to final demand by 531 column industries, also is available from RIMS II. The entries in table A-2.2 are aggregations of the entries in table A-1.2.

Employment Multipliers

Employment multipliers for a given industry in a region show the number of jobs that regional industries provide, both directly and indirectly, in order for the given industry to deliver 1 million dollars of output to final demand.^{6/} Table II.4 shows employment multipliers for the industries from tables II.1-II.3. Column 1 shows, for example, that in order for industry 1 to deliver 1 million dollars of output to final demand, regional firms must provide (1) 18 jobs in the same industry, (2) 3 jobs, 1 job, and 0 jobs, respectively, in industries 2 through 4, and (3) 0 jobs in domestic employment.^{7/}

**Table II.4.--Industry-by-Industry Employment Multipliers
for a Hypothetical Region**

[Number of jobs, direct and indirect, per 1 million dollars of
output delivered to final demand]

	Purchasing industry				Households
	1	2	3	4	
1.....	18	4	2	2	3
2.....	3	18	3	1	3
3.....	1	1	9	1	1
4.....	0	0	0	6	1
Households.....	0	0	0	0	1
Total.....	22	23	14	10	9

NOTE.--Each entry represents the number of jobs provided, directly and indirectly, by the row industry for each 1 million dollars of output delivered to final demand by the column industry.

6. Output is expressed per million dollars, rather than per dollar, to minimize cases in which the number of jobs is less than 1.

7. Column 1 of table II.4 is derived by multiplying each entry in column 1 of table II.3 by the corresponding ratio of employment to earnings from BEA's two-digit-SIC State employment and earnings data. For the underlying data, see U.S. Department of Commerce, Bureau of Economic Analysis, 1985 OBERS, BEA Regional Projections, State Projections to 2035 (Washington, DC: U.S. Government Printing Office, 1985); order no. 003-010-00157-7; price \$4.75.

Employment multipliers for industry 1 can be viewed as estimates of the total (direct and indirect) changes in number of jobs that occur in regional industries for each additional 1 million dollars of output of industry 1 delivered to final demand. For industry 1, the total (all-industry) employment multiplier is 22 jobs (the sum of the entries in column 1).

Appendix A contains a sample table (A-2.3) of employment multipliers available from RIMS II for Louisiana. The entries in table A-2.3 are the changes in number of jobs that occur in 39 row industries per 1 million dollars of output delivered to final demand by the same 39 column industries. A similar table (A-1.3, not shown), with entries showing the changes in number of jobs that occur in 39 row industries per 1 million dollars of output delivered to final demand by 531 column industries, also is available from RIMS II. The entries in table A-2.3 are aggregations of the entries in table A-1.3.

Total Multipliers for Output, Earnings, and Employment

Appendix A also contains a sample table (A-2.4) of total (all-industry) multipliers for output, earnings, and employment, available from RIMS II for Louisiana. Each entry in table A-2.4 is a sum of changes that occur in all row industries for each additional dollar (or, in the case of employment, 1 million dollars) of output delivered to final demand by the industry corresponding to the entry. Appendix B contains copies of tables corresponding to A-2.4 for all States, plus the District of Columbia. A similar table (A-1.4, not shown), with each of 531 line entries showing a sum of changes that occur in 531 industries for each additional dollar (or 1 million dollars) of output delivered to final demand by the industry numerical designation corresponding to the entry, also is available from RIMS II.

Availability of Regional Multipliers From RIMS II

For any region composed of one or more counties, RIMS II can provide two series of tables of I-O multipliers; series A-1 is for detailed industries, and series A-2 is for industry aggregations. Each series consists of four tables of multipliers, one table each for output, earnings, employment, and a summary. To order the tables, contact the Analysis Branch, Regional Economic Analysis Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230 (phone 202-523-0528 or -0594). Prices of tables (two series per region) are on a descending scale, starting at \$1,500 per region for the first region ordered.

III. Information Required From Users of RIMS II

The preceding chapter explains the meaning of the multipliers from RIMS II that appear in appendixes A and B. Proper use of the multipliers to estimate the regional economic impacts of project and program expenditures requires conversion of the expenditures to changes in output delivered to final demand (hereafter referred to as "final-demand changes") in industries in regions. Final-demand changes in an industry in a region reflect purchases of goods and services, typically by consumers and businesses outside the region, by investors, and by government. The delivery of the final goods and services ends successive rounds of repercussions on the output of the region's industries. This chapter discusses information that users of RIMS II must supply for converting expenditures into final-demand changes in regional industries.

Users must decide on the level of industrial detail to which to assign project and program expenditures. Suppose, for example, that users want to estimate the impact on output in Louisiana of a \$100 million expenditure by the Federal Government for public works, divided evenly between the construction and the maintenance and repair of sewer facilities, highways, and streets. Users can view the expenditure as final-demand changes of \$50 million each, occurring in 2 of the 39 industry aggregations in appendix D--that is, new construction (industry 6) and maintenance and repair construction (industry 7). The impact of the expenditure on output in Louisiana is obtained by multiplying each final-demand change--\$50 million--by total multipliers for output for each of the two industry aggregations--2.1950 and 2.0947 (see table A-2.4, appendix A). Alternatively, users can view the expenditure as final-demand changes of \$25 million each, occurring in 4 of the 531 detailed industries in appendix C--that is, new sewer facilities construction (industry 11.0307), new highways and streets construction (11.0400), maintenance and repair of sewer facilities (12.0210), and maintenance and repair of highways and streets (12.0214). In this case, the impact of the expenditure on output in Louisiana is obtained by multiplying each final-demand change--\$25 million--by total multipliers for output for each of the four detailed industries--2.3009, 2.2732, 2.1649, and 2.1167 (see totals for columns 11.0307, 11.0400, 12.0210, and 12.0214, table A-1.1, appendix A).

Users also must decide on the level of geographic detail at which to estimate the economic impacts of project and program expenditures. In some cases, users will choose a county grouping that already has been defined for planning purposes. For example, if users belong to an agency that plans for Louisiana, they might want estimates of the impacts of the expenditure on public works for the State as a whole (all parishes). In other cases, users will choose a county grouping that best approximates the region in which the

impacts mainly occur. For example, if the public works are to be built in Calcasieu Parish, users might want estimates of the impacts for a grouping of parishes, including Calcasieu, in which production of most of the direct and indirect requirements per dollar of public works construction occurs. Such a grouping might be the Lake Charles economic area, as defined by BEA; it consists of Calcasieu Parish (a metropolitan statistical area that serves as a center of trade) and five other parishes (Allen, Beauregard, Cameron, Jefferson Davis, and Vernon) that are economically related to the center./1/ As stated earlier, multipliers from RIMS II can be estimated for any region composed of one or more counties.

1. See "The BEA Economic Areas: Structural Changes and Growth, 1950-73," Survey of Current Business 55 (November 1975): 14-25.

IV. Illustrative Uses of RIMS II: Case Studies

This chapter contains three case studies that illustrate how users of RIMS II can estimate the regional economic impacts of project and program expenditures, using multipliers from RIMS II (see chapter II) and information for converting expenditures into final-demand changes in industries in regions (see chapter III).

Case Study 1: Building a New Factory and Manufacturing Its Output

Suppose a firm that makes electric industrial controls (for example, motor starters) plans to invest \$10 million to build a new factory in Louisiana. After completion of the factory, the firm plans to manufacture in its first year of operation \$35 million worth of industrial controls for sale to businesses outside Louisiana. Both the investment in the factory and the export of industrial controls are changes in final demand. The completion of the factory and the delivery of the industrial controls end successive rounds of repercussions on the output of Louisiana's industries. Users want to estimate the impacts of the final-demand changes on Louisiana's economy.

Estimating the impacts of building the factory

Users must decide on the level of industrial detail to which to assign the building of the factory. They can view the building of the factory as a final-demand change of \$10 million occurring in (1) the new construction industry as a whole (industry 6 in appendix D) or (2) the new industrial buildings construction industry (industry 11.0201 in appendix C). Assume that they choose the new construction industry as a whole.

Table IV.1 shows the derivation of estimates of the impacts of building the factory, using multipliers from RIMS II. Column 1 reproduces column 6, table A-2.1, from appendix A. Each entry in column 1 is the dollar change in output that occurs in each row industry for each additional dollar of output delivered to final demand by the new construction industry. To obtain the dollar impact on the output of each row industry of an additional \$10 million of output delivered to final demand by the new construction industry, multiply each entry in column 1 by \$10 million. Column 4 shows the resulting impacts; the column total--\$21.9 million--is the dollar impact on the output of all industries.

Column 2 reproduces column 6, table A-2.2, from appendix A. Each entry in column 2 is the dollar change in earnings of households employed by each row industry for each additional dollar of output delivered to final demand by the new construction industry. To obtain the impact on earnings paid to households by each row industry of an additional \$10 million of output

Table IV.1.--Multipliers, by Industry, for Output, Earnings, and Employment, and Impacts, by Industry, on Output, Earnings, and Employment of a \$10 Million Change in Final Demand, New Construction Industry, Louisiana

	Multipliers			Impacts/4/		
	Output/1/ (dollars)	Earnings/2/ (dollars)	Employment/3/ (number of jobs)	Output (thousands of dollars)	Earnings (thousands of dollars)	Employment (number of jobs)

Total.....	2.1950	.7055	38.4	21,950	7,055	384

1. Each entry in column 1 represents the dollar change in output that occurs in each row industry for each additional dollar of output delivered to final demand by the new construction industry. The column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. The column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

2. Each entry in column 2 represents the dollar change in earnings of households employed by each row industry for each additional dollar of output delivered to final demand by the new construction industry. The column total equals the entry in row 39, column 1.

3. Each entry in column 3 represents the change in number of jobs in each row industry for each additional 1 million dollars of output delivered to final demand by the new construction industry.

4. For each row industry, the entries in columns 4, 5, and 6 are obtained by multiplying \$10 million by the entries in columns 1, 2, and 3, respectively.

NOTE.--Column entries may not sum to totals due to rounding.

SOURCE.--Regional Input-Output Modeling System (RIMS II), Regional Economic Analysis Division, Bureau of Economic Analysis.

delivered to final demand by the new construction industry, multiply each entry in column 2 by \$10 million. Column 5 shows the resulting impacts; the column total--\$7.1 million--is the impact on the earnings paid to households by all industries.

Column 3 reproduces column 6, table A-2.3, from appendix A. Each entry in column 3 shows the change in number of jobs in each row industry for each additional 1 million dollars of output delivered to final demand by the new construction industry. To estimate the impact on the number of jobs provided by each row industry of an additional \$10 million of output delivered to final demand by the new construction industry, multiply each entry in column 3 by \$10 million. Column 6 shows the resulting impacts; the column total--384 jobs--is the impact on the number of jobs provided by all industries.

The new construction industry consists of 36 detailed industries, ranging from new dams and reservoirs to new industrial buildings. Users have the option of viewing the building of the factory as a change in final demand for new industrial buildings, rather than new construction as a whole. Table IV.2 compares estimates of the impacts, based on total multipliers for new industrial buildings, with estimates from table IV.1, based on total multipliers for new construction./1/

Estimating the impacts of manufacturing the output of the factory

Planners can view the manufacturing of the output of the factory in the first year of operation as a final-demand change of \$35 million occurring in (1) the electric and electronic equipment industry as a whole (industry 20 in appendix D) or (2) the industrial controls equipment industry (industry 53.0500 in appendix C). Table IV.3 shows the derivation of estimates of the impacts of manufacturing the output of the factory. The estimates are based on total multipliers from RIMS II for both the industry aggregation and the detailed industry./2/ When estimated for the industry aggregation, impacts total \$64.1 million in output, \$18.9 million in earnings, and 935 jobs. When estimated for the detailed industry, impacts total \$63.0 million in output, \$21.1 million in earnings, and 1,040 jobs.

1. The total multiplier for output for new industrial buildings is the total for column 11.0201 in table A-1.1, appendix A.

2. The total multipliers for the industry aggregation are the totals for column 20 in tables A-2.1, A-2.2, and A-2.3, in appendix A; they are summarized in table A-2.4, appendix A, and in table B for Louisiana, appendix B. The total multiplier for output for the detailed industry is the total for column 53.0500 in table A-1.1, appendix A.

Table IV.2.--Total Multipliers for Output, Earnings, and Employment, and Impacts on Output, Earnings, and Employment of a \$10 Million Change in Final Demand, Aggregated and Detailed Construction Industries, Louisiana

Construction industry	Multipliers			Impacts/4/		
	Output/1/ (dollars)	Earnings/2/ (dollars)	Employment/3/ (number of jobs)	Output (thousands of dollars)	Earnings (thousands of dollars)	Employment (number of jobs)
	(1)	(2)	(3)	(4)	(5)	(6)
New construction...	2.1950	0.7055	38.4	21,950	7,055	384
New industrial buildings.....	2.1230	.7463	39.8	21,230	7,463	398

1. Each entry in column 1 represents the total dollar change in output that occurs in all industries for each additional dollar of output delivered to final demand by the corresponding construction industry.

2. Each entry in column 2 represents the total dollar change in earnings of households employed by all industries for each additional dollar of output delivered to final demand by the corresponding construction industry.

3. Each entry in column 3 represents the total change in number of jobs in all industries for each additional 1 million dollars of output delivered to final demand by the corresponding construction industry.

4. For each construction industry, the entries in columns 4, 5, and 6 are obtained by multiplying \$10 million by the entries in columns 1, 2, and 3, respectively.

SOURCE.--Regional Input-Output Modeling System (RIMS II), Regional Economic Analysis Division, Bureau of Economic Analysis.

Table IV.3.--Total Multipliers for Output, Earnings, and Employment, and Impacts on Output, Earnings, and Employment of a \$35 Million Change in Final Demand, Aggregated and Detailed Manufacturing Industries, Louisiana

Manufacturing industry	Multipliers			Impacts/4/		
	Output/1/ (dollars)	Earnings/2/ (dollars)	Employment/3/ (number of jobs)	Output (thousands of dollars)	Earnings (thousands of dollars)	Employment (number of jobs)
	(1)	(2)	(3)	(4)	(5)	(6)
Electric and electronic equipment.....	1.8323	0.5394	26.7	64,131	18,879	935
Industrial controls.....	1.7988	.6041	29.7	62,958	21,144	1,040

1. Each entry in column 1 represents the total dollar change in output that occurs in all industries for each additional dollar of output delivered to final demand by the corresponding manufacturing industry.

2. Each entry in column 2 represents the total dollar change in earnings of households employed by all industries for each additional dollar of output delivered to final demand by the corresponding manufacturing industry.

3. Each entry in column 3 represents the total change in number of jobs in all industries for each additional 1 million dollars of output delivered to final demand by the corresponding manufacturing industry.

4. For each manufacturing industry, the entries in columns 4, 5, and 6 are obtained by multiplying \$35 million by the entries in columns 1, 2, and 3, respectively.

SOURCE.--Regional Input-Output Modeling System (RIMS II), Regional Economic Analysis Division, Bureau of Economic Analysis.

Case Study 2: Expenditures by Tourists

Suppose a State economic development agency estimates that next year expenditures by out-of-State tourists in Louisiana will increase by \$4.7 billion, divided as follows:

Millions of dollars	
Public transportation.....	845
Automobile transportation.....	1,410
Retail goods.....	280
Lodging.....	570
Entertainment and recreation.....	375
Eating and drinking.....	1,220
Total.....	4,700

Users of RIMS II want to estimate the impacts of expenditures by tourists on Louisiana's economy.

The expenditures for transportation, retail goods, lodging, entertainment and recreation, and eating and drinking are changes in final demand. Delivery of these services to out-of-State tourists ends successive rounds of repercussions on the output of Louisiana's industries. The expenditure for retail goods reflects charges for the output of wholesalers, transporters, and manufacturers, as well as of retailers. Assume that the wholesalers and transporters, as well as the retailers, are located in Louisiana, and that the manufacturers are located outside Louisiana. Then, the charges for wholesale, retail, and transportation output (but not manufacturing output) are changes in final demand in Louisiana. (In input-output terms, wholesale and retail output, which is referred to as "margin," consists of operating expenses, profits, sales taxes, and excise taxes.) These final-demand changes can be estimated by multiplying the expenditure for retail goods (\$280 million) by the percentage shares of national personal consumption expenditures in the category "other recreation" that are accounted for by the wholesale trade industry (0.6 percent), the retail trade industry (4.8 percent), and the transportation industry (0.5 percent).^{3/} The resulting estimates are \$2 million for wholesale trade, \$13 million for retail trade, and \$1 million for transportation.

Assuming that users choose to assign expenditures by tourists to industry aggregations from appendix D, users can view the expenditures as follows: (1) The sum of public and automobile transportation as a final-demand change of \$2,255 million occurring in the transportation industry (industry 25 in appendix D), (2) the sum of lodging and entertainment and recreation as a final-demand change of \$945 million in the hotels and lodging places and

3. See table B, Detailed Input-Output Commodity Composition of Personal Consumption Expenditures, in Producers' and Purchasers' Prices, 1977, available from BEA's Interindustry Economics Division.

amusements industry (industry 33), (3) eating and drinking as a final-demand change of \$1,220 million in the eating and drinking places industry (industry 36), and (4) retail goods as final-demand changes of \$2 million in the wholesale trade industry (industry 28), \$13 million in the retail trade industry (industry 29), and \$1 million in the transportation industry (which must be added to the \$2,255 million noted earlier). The sum of these final-demand changes is \$4,436 million, or \$264 million less than total expenditures by tourists. The difference equals the expenditure for retail goods (\$280 million) minus the portion of the expenditure that is a final-demand change in Louisiana (\$16 million).

Table IV.4 shows the derivation of estimates of the impacts of expenditures by tourists. The estimates are based on total multipliers from RIMS II for the tourist-related industries to which the final-demand changes are assigned.^{4/} For example, to estimate the impact on the output of all industries of an additional \$1,220 million of services delivered to final demand by eating and drinking places, multiply \$1,220 million by the total multiplier for the output of eating and drinking places--1.9896. When summed for all tourist-related industries, impacts total \$9,430 million in output, \$2,827 million in earnings, and 204 thousand jobs.

Case Study 3: Shutting Down a Military Base

Suppose the Federal Government, in order to operate a military base in Calcasieu Parish, Louisiana, spends \$11.3 million annually in Calcasieu and nearby parishes, divided among industries as follows:

	Thousands of dollars
Maintenance and repair construction.....	560
Manufacturing.....	4,045
Food and kindred products and tobacco.....	3,200
Apparel.....	10
Printing and publishing.....	45
Chemicals and petroleum refining.....	315
Fabricated metal products.....	205
Motor vehicles and equipment.....	235
Transportation equipment, except motor vehicles....	20
Miscellaneous manufacturing industries.....	15
Communication.....	735
Electric, gas, water, and sanitary services.....	2,195
Business services.....	730
Miscellaneous services.....	120
Earnings paid to local residents.....	2,885
Total.....	11,270

4. The total multipliers for the tourist-related industries are the totals for columns 25, 28, 29, 33, and 36, in tables A-2.1, A-2.2, and A-2.3, in appendix A; they are summarized in table A-2.4, appendix A, and in table B for Louisiana, appendix B.

Table IV.4.--Total Multipliers for Output, Earnings, and Employment, and Impacts on Output, Earnings, and Employment of a \$4.4 Billion Change in Final Demand, Tourist-Related Industries, Louisiana

Tourist-related industry	Change in final demand (millions of dollars)	Multipliers			Impacts/4/		
		Output/1/ (dollars)	Earnings/2/ (dollars)	Employment/3/ (number of jobs)	Output (millions of dollars)	Earnings (millions of dollars)	Employment (number of jobs)
	(1)	(2)	(3)	(4)	(5)	(6)	(7)
Transportation.....	2,256	2.2919	0.6894	34.8	5,171	1,555	78,509
Wholesale trade.....	2	1.9016	.6616	35.7	4	1	71
Retail trade.....	13	1.9332	.7628	56.6	25	10	736
Hotels and lodging places and amusements.....	945	1.9075	.5852	51.6	1,803	553	48,762
Eating and drinking places.....	1,220	1.9896	.5801	62.4	2,427	708	76,128
Total.....	4,436	9,430	2,827	204,206

1. Each entry in column 2 represents the total dollar change in output that occurs in all industries for each additional dollar of output delivered to final demand by the corresponding tourist-related industry.

2. Each entry in column 3 represents the total dollar change in earnings of households employed by all industries for each additional dollar of output delivered to final demand by the corresponding tourist-related industry.

3. Each entry in column 4 represents the total change in number of jobs in all industries for each additional 1 million dollars of output delivered to final demand by the corresponding tourist-related industry.

4. For each tourist-related industry, the entries in columns 5, 6, and 7 are obtained by multiplying the entry in column 1 by the entries in columns 2, 3, and 4, respectively.

SOURCE.--Regional Input-Output Modeling System (RIMS II), Regional Economic Analysis Division, Bureau of Economic Analysis.

Users of RIMS II want to estimate the impacts of shutting down the base on the region where most of the impacts are expected to occur. Users choose the Lake Charles economic area as the region for analysis.

The expenditures for maintenance and repair construction; communication; electric, gas, water, and sanitary services; business services; miscellaneous services; and earnings paid to local residents are changes in final demand. The delivery of this final output to the Federal Government ends successive rounds of repercussions on the output of industries in Lake Charles. The expenditures for manufactured goods reflect charges for the output of wholesalers and transporters, as well as of manufacturers. Assume that the wholesalers, transporters, and manufacturers are located in Lake Charles. Then, the charges for wholesale, transportation, and manufacturing output are changes in final demand in Lake Charles. (In input-output terms, wholesale output, which is referred to as "margin," consists of operating expenses, profits, sales taxes, and excise taxes.) These final-demand changes can be estimated by multiplying the expenditure for each manufactured good by the percentage shares of the price paid for the good (as reflected in the Federal Government's defense budget) that are accounted for by wholesale margins, transportation costs, and producers' prices. For example, the final-demand changes associated with the expenditure for printing and publishing can be estimated by multiplying the expenditure (\$45 thousand) by the shares of the price paid for printing and publishing that are accounted for by wholesale margins (5 percent), transportation costs (0 percent), and producers' prices (95 percent).⁵ The resulting estimates, which must sum to the total for manufacturing in the preceding listing, are as follows:

	Thousands of dollars
Wholesale trade.....	366
Transportation.....	74
Manufacturing.....	3,605
Food and kindred products and tobacco.....	2,831
Apparel.....	10
Printing and publishing.....	43
Chemicals and petroleum refining.....	286
Fabricated metal products.....	183
Motor vehicles and equipment.....	220
Transportation equipment, except motor vehicles....	20
Miscellaneous manufacturing industries.....	12
Total.....	4,045

Assuming that users choose to assign the expenditures for operating the base to industry aggregations from appendix D, they can view the expenditures as the final-demand changes shown in table IV.5, column 1. Table IV.5 shows

5. See Table A, Input-Output Commodity Composition of Final Demand, in Producers' and Purchasers' Prices, 1977, in "The Input-Output Structure of the U.S. Economy, 1977," Survey of Current Business 64 (May 1984): 42-84.

Table IV.5.--Total Multipliers for Output, Earnings, and Employment, and Impacts on Output, Earnings, and Employment of an \$11.3 Million Change in Final Demand, Defense-Related Industries, Lake Charles Economic Area

Defense-related industry	Change in final demand (thousands of dollars)	Multipliers			Impacts/4/		
		Output/1/ (dollars)	Earnings/2/ (dollars)	Employment/3/ (number of jobs)	Output (thousands of dollars)	Earnings (thousands of dollars)	Employment (number of jobs)
	(1)	(2)	(3)	(4)	(5)	(6)	(7)
Maintenance and repair construction.....	560	1.7461	0.6818	36.0	978	382	20

Total.....	11,271	16,906	3,959	232

1. Each entry in column 2 represents the total dollar change in output that occurs in all industries for each additional dollar of output not delivered to final demand by the corresponding defense-related industry.

2. Each entry in column 3 represents the total dollar change in earnings of households employed by all industries for each additional dollar of output not delivered to final demand by the corresponding defense-related industry.

3. Each entry in column 4 represents the total change in number of jobs in all industries for each additional 1 million dollars of output not delivered to final demand by the corresponding defense-related industry.

4. For each defense-related industry, the entries in columns 5, 6, and 7 are obtained by multiplying the entry in column 1 by the entries in columns 2, 3, and 4, respectively.

SOURCE.--Regional Input-Output Modeling System (RIMS II), Regional Economic Analysis Division, Bureau of Economic Analysis.

the derivation of the impacts of not operating the military base. The estimates are based on total multipliers from RIMS II for the defense-related industries to which the final-demand changes are assigned. For example, to estimate the impact on the earnings of households employed by all industries of \$730 thousand of services not delivered to final demand by the business services industry, multiply \$730 thousand by the total multiplier for earnings for the business services industry--0.6823. When summed for all defense-related industries, impacts total \$16,906 thousand in output, \$3,959 thousand in earnings, and 232 jobs.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-39; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-39; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-39; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

Total/1/	1.6572	1.6600	1.6473	1.7359	1.6476	1.6610	1.5821	1.5863	1.7150	1.0000	1.0000	1.6867	1.7461	1.6809	1.6666

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-39; these entries include earnings paid to households employed in industries 1-39. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

Total/1/	1.8125	1.6416	1.0000	1.7895	1.7030	1.8038	1.7620	1.7241	1.7988	1.7872	1.0000	1.0000	1.7215	1.0000	1.0000

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix C identifies the column industries, and appendix D identifies the row industries.

1. Each column total is the sum of the entries in rows 1-38; these entries include earnings paid to households employed in industries 1-38. Each column total excludes the entry in row 39; this entry is the sum of earnings paid to households.

NOTE.--Each entry represents the dollar change in output that occurs in the row industry for each additional dollar of output delivered to final demand by the column industry. Appendix D identifies the row and column industries.

Table A-2.4.--Total Multipliers, by Industry Aggregation, for Output, Earnings, and Employment

	Output/1/ (dollars)	Earnings/2/ (dollars)	Employment/3/ (number of jobs)
Agriculture, forestry, and fisheries:			
Agricultural products and agricultural, forestry, and fishery services.....	2.0531	0.5701	55.3
Forestry and fishery products.....	1.9815	.6115	57.8
Mining:			
Coal mining.....	1.6418	.4878	16.4
Crude petroleum and natural gas.....	1.5102	.2344	11.1
Miscellaneous mining.....	1.8982	.4560	22.7
Construction:			
New construction.....	2.1950	.7055	38.4
Maintenance and repair construction.....	2.0947	.7812	41.6
Manufacturing:			
Food and kindred products and tobacco.....	1.9790	.3843	24.8
Textile mill products.....	1.7335	.4885	34.8
Apparel.....	1.6396	.4779	39.1
Paper and allied products.....	2.1873	.5097	23.8
Printing and publishing.....	2.1272	.6624	39.8
Chemicals and petroleum refining.....	2.0766	.2908	13.1
Rubber and leather products.....	2.1079	.4767	24.1
Lumber and wood products and furniture.....	2.3440	.5728	37.8
Stone, clay, and glass products.....	2.1168	.5631	28.9
Primary metal industries.....	1.7535	.3628	16.3
Fabricated metal products.....	1.6810	.4559	22.5
Machinery, except electrical.....	1.7379	.5145	24.9
Electric and electronic equipment.....	1.8323	.5394	26.7
Motor vehicles and equipment.....	1.3772	.2272	10.7
Transportation equipment, except motor vehicles.....	1.8895	.6447	29.8
Instruments and related products.....	1.7935	.5654	29.1
Miscellaneous manufacturing industries.....	1.8923	.5237	39.3
Transportation, communication, and utilities:*			
Transportation.....	2.2919	.6894	34.8
Communication.....	1.5708	.4361	19.7
Electric, gas, water, and sanitary services.....	1.9690	.2844	12.9
Wholesale and retail trade:			
Wholesale trade.....	1.9016	.6616	35.7
Retail trade.....	1.9332	.7628	56.6
Finance, insurance, and real estate:			
Finance.....	1.8102	.5553	30.7
Insurance.....	2.1913	.8117	42.0
Real estate.....	1.3556	.1377	10.8
Services:			
Hotels and lodging places and amusements.....	1.9075	.5852	51.6
Personal services.....	1.8661	.6975	63.7
Business services.....	1.8699	.7467	48.6
Eating and drinking places.....	1.9896	.5801	62.4
Health services.....	2.0575	.8885	47.7
Miscellaneous services.....	2.0035	.6767	38.2
Households.....	1.1199	.3325	23.1

- * Includes government enterprises.
1. Each entry in column 1 represents the total dollar change in output that occurs in all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.
 2. Each entry in column 2 represents the total dollar change in earnings of households employed by all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.
 3. Each entry in column 3 represents the total change in number of jobs in all row industries for each additional 1 million dollars of output delivered to final demand by the industry corresponding to the entry.

1. Each entry in column 1 represents the total dollar change in output that occurs in all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.

2. Each entry in column 2 represents the total dollar change in earnings of households employed by all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.

3. Each entry in column 3 represents the total change in number of jobs in all row industries for each additional 1 million dollars of output delivered to final demand by the industry corresponding to the entry.

1. Each entry in column 1 represents the total dollar change in output that occurs in all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.

2. Each entry in column 2 represents the total dollar change in earnings of households employed by all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.

3. Each entry in column 3 represents the total change in number of jobs in all row industries for each additional 1 million dollars of output delivered to final demand by the industry corresponding to the entry.

* Includes government enterprises.

1. Each entry in column 1 represents the total dollar change in output that occurs in all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.

2. Each entry in column 2 represents the total dollar change in earnings of households employed by all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.

3. Each entry in column 3 represents the total change in number of jobs in all row industries for each additional 1 million dollars of output delivered to final demand by the industry corresponding to the entry.

Eating and drinking places.....	2.2071	.6469	68.5
Health services.....	2.0844	.9034	52.2
Miscellaneous services.....	2.0227	.7158	44.5
Households.....	1.1494	.3553	24.7

* Includes government enterprises.

1. Each entry in column 1 represents the total dollar change in output that occurs in all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.

2. Each entry in column 2 represents the total dollar change in earnings of households employed by all row industries for each additional dollar of output delivered to final demand by the industry corresponding to the entry.

3. Each entry in column 3 represents the total change in number of jobs in all row industries for each additional 1 million dollars of output delivered to final demand by the industry corresponding to the entry.

**Appendix C. Detailed Industries for Which Multipliers are
Available (one table)**

TABLE C.—Industry Classification of the 1977 Input-Output Tables¹

The titles in bold face represent the groupings of industries used for the summary version of the 1977 tables.

Industry number and title	Related Census-SIC codes (1977 edition)	Industry number and title	Related Census-SIC codes (1977 edition)
AGRICULTURE, FORESTRY, AND FISHERIES			
1 Livestock and livestock products			
1.0100 Dairy farm products.....	0241, pt. 0191, pt. 0259, pt. 0291.	11.0204 New garages and service stations.....	pt. 15-17
1.0200 Poultry and eggs.....	025 (excl. 0254 and pt. 0259), pt. 0191, pt. 0219, pt. 0291.	11.0205 New stores and restaurants.....	pt. 15-17
1.0301 Meat animals.....	021 (excl. pt. 0219), pt. 0191, pt. 0259, pt. 0291.	11.0206 New religious buildings.....	pt. 15-17
1.0302 Miscellaneous livestock.....	027 (excl. pt. 0279), pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0207 New educational buildings.....	pt. 15-17
2 Other agricultural products			
2.0100 Cotton.....	0131, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0231 New hospitals.....	pt. 15-17
2.0201 Food grains.....	pt. 011, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0232 New residential institutions and other health related facilities.....	pt. 15-17
2.0202 Feed grains.....	pt. 011, pt. 0139, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0241 New amusement and recreation buildings.....	pt. 15-17
2.0203 Grass seeds.....	pt. 0139, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0250 Other new nonfarm buildings.....	pt. 15-17
2.0300 Tobacco.....	0132, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0301 New telephone and telegraph facilities.....	pt. 16-17
2.0401 Fruits.....	pt. 017, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0302 New railroads.....	pt. 16-17
2.0402 Tree nuts.....	0173, pt. 0179, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0303 New electric utility facilities.....	pt. 16-17
2.0501 Vegetables.....	0134, 0161, pt. 0119, pt. 0139, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0304 New gas utility facilities.....	pt. 16-17
2.0502 Sugar crops.....	0133, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0305 New petroleum pipelines.....	pt. 16-17
2.0503 Miscellaneous crops.....	pt. 0119, pt. 0139, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0306 New water supply facilities.....	pt. 16-17
2.0600 Oil bearing crops.....	0116, pt. 0119, pt. 013, pt. 0173, pt. 0219, pt. 0259, pt. 0291.	11.0307 New sewer system facilities.....	pt. 16-17
2.0701 Forest products.....	pt. 018, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0308 New local transit facilities.....	pt. 16-17
2.0702 Greenhouse and nursery products.....	pt. 018, pt. 0191, pt. 0219, pt. 0259, pt. 0291.	11.0400 New highways and streets.....	pt. 16-17
3 Forestry and fishery products			
3.0001 Forestry products.....	081-4, 097.	11.0501 New farm housing units and additions and alterations.....	pt. 15, pt. 17
3.0002 Commercial fishing.....	091.	11.0502 New farm service facilities.....	pt. 15, pt. 17
4 Agricultural, forestry, and fishery services			
4.0001 Agricultural, forestry, and fishery services.....	0254, 07 (excl. 074, and 078), 085, 092, pt. 0279.	11.0601 New petroleum and natural gas well drilling.....	pt. 138
4.0002 Landscape and horticultural services.....	078.	11.0602 New petroleum, natural gas, and solid mineral exploration.....	pt. 108, pt. 1112, pt. 1213, pt. 138, pt. 148
MINING			
5 Iron and ferroalloy ores mining			
5.0000 Iron and ferroalloy ores mining.....	101, 106.	11.0603 New access structures for solid mineral development.....	pt. 108, pt. 1112, pt. 1213, pt. 148
6 Nonferrous metal ores mining			
6.0100 Copper ore mining.....	102.	11.0701 New military facilities.....	pt. 15-17
6.0200 Nonferrous metal ores mining, except copper.....	103-5, pt. 108, 109.	11.0702 New dams and reservoirs.....	pt. 15-17
7 Coal mining			
7.0000 Coal mining.....	1111, pt. 1112, 1211, pt. 1213.	11.0703 Other new conservation and development facilities.....	pt. 15-17
8 Crude petroleum and natural gas			
8.0000 Crude petroleum and natural gas.....	131, 132.	11.0704 Other new nonbuilding facilities.....	pt. 15-17
9 Stone and clay mining and quarrying			
9.0001 Dimension, crushed and broken stone mining and quarrying.....	141-2.	12 Maintenance and repair construction	
9.0002 Sand and gravel mining.....	144.	12.0100 Maintenance and repair, residential.....	pt. 15, pt. 17
9.0003 Clay, ceramic, and refractory minerals mining.....	145.	12.0201 Maintenance and repair of other nonfarm buildings.....	pt. 15-17
9.0004 Nonmetallic mineral services and miscellaneous minerals mining.....	pt. 148, 149.	12.0202 Maintenance and repair of farm residential buildings.....	pt. 1215, pt. 17
10 Chemical and fertilizer mineral mining			
10.0000 Chemical and fertilizer mineral mining.....	147.	12.0203 Maintenance and repair of farm service facilities.....	pt. 15, pt. 17
CONSTRUCTION			
11 New construction			
11.0101 New residential 1-unit structures, nonfarm.....	pt. 15, pt. 17, pt. 6552	12.0204 Maintenance and repair of telephone and telegraph facilities.....	pt. 16-17
11.0102 New residential 2-4 unit structured, nonfarm.....	pt. 15-17.	12.0205 Maintenance and repair of railroads.....	pt. 16-17
11.0103 New residential garden apartments.....	pt. 15-17, pt. 6552.	12.0206 Maintenance and repair of electric utility facilities.....	pt. 16-17
11.0104 New residential high-rise apartments.....	pt. 15-17.	12.0207 Maintenance and repair of gas utility facilities.....	pt. 16-17
11.0105 New residential additions and alterations, nonfarm.....	pt. 15-17.	12.0208 Maintenance and repair of petroleum pipelines.....	pt. 16-17
11.0106 New hotels and motels.....	pt. 15-17.	12.0209 Maintenance and repair of water supply facilities.....	pt. 16-17
11.0107 New dormitories and other group housing.....	pt. 15-17.	12.0210 Maintenance and repair of sewer facilities.....	pt. 16-17
11.0201 New industrial buildings.....	pt. 15-17.	12.0211 Maintenance and repair of local transit facilities.....	pt. 16-17
11.0202 New office buildings.....	pt. 15-17.	12.0212 Maintenance and repair of military facilities.....	pt. 15-17
11.0203 New warehouses.....	pt. 15-17.	12.0213 Maintenance and repair of conservation and development facilities.....	pt. 15-17
		12.0214 Maintenance and repair of highways and streets.....	pt. 16-17
		12.0215 Maintenance and repair of petroleum and natural gas wells.....	pt. 138
		12.0216 Maintenance and repair of other nonbuilding facilities.....	pt. 15-17
		MANUFACTURING	
		13 Ordnance and accessories	
		13.0100 Guided missiles and space vehicles.....	3761.
		13.0200 Ammunition, except for small arms, n.e.c.....	3483.
		13.0300 Tank and tank components.....	3795.
		13.0500 Small arms.....	3484.
		13.0600 Small arms ammunition.....	3482.
		13.0700 Other ordnance and accessories.....	3489.
		14 Food and kindred products	
		14.0101 Meat packing plants.....	2011.
		14.0102 Sausages and other prepared meats.....	2013.
		14.0103 Poultry dressing plants.....	2016.
		14.0104 Poultry and egg processing.....	2017.
		14.0200 Creamery butter.....	2021.
		14.0300 Cheese, natural and processed.....	2022.
		14.0400 Condensed and evaporated milk.....	2023.
		14.0500 Ice cream and frozen desserts.....	2024.
		14.0600 Fluid milk.....	2026.
		14.0700 Canned and cured sea foods.....	2091.
		14.0800 Canned specialties.....	2032.
		14.0900 Canned fruits and vegetables.....	2033.
		14.1000 Dehydrated food products.....	2034.
		14.1100 Pickles, sauces, and salad dressings.....	2035.

63.0100 Optical instruments and lenses	383.		73.0301 Legal services		811.
63.0200 Ophthalmic goods	385.		73.0302 Engineering, architectural, and surveying services		8911.
63.0300 Photographic equipment and supplies	386.		73.0303 Accounting, auditing and bookkeeping, and miscellaneous services, n.e.c.		893, 899.
64 Miscellaneous manufacturing			74 Eating and drinking places		
64.0101 Jewelry, precious metal	3911.		74.0000 Eating and drinking places		58, pt. 70.
64.0102 Jewelers' materials and lapidary work	3915.		75 Automobile repair and services		
64.0104 Silverware and plated ware	3914.		75.0001 Automotive rental and leasing, without drivers		751.
64.0105 Costume jewelry	3961.		75.0002 Automotive repair shops and services		753, 7549.
64.0200 Musical instruments	393.		75.0003 Automobile parking and car washes		752, 7542.
64.0301 Games, toys, and children's vehicles	3944.		76 Amusements		
64.0302 Dolls	3942.		76.0100 Motion pictures		78.
64.0400 Sporting and athletic goods, n.e.c.	3949.		76.0201 Theatrical producers (except motion pictures), bands, and entertainers		792.
64.0501 Pens and mechanical pencils	3951.		76.0202 Bowling alleys, billiard and pool establishments		793.
64.0502 Lead pencils and art goods	3952.		76.0203 Commercial sports, except racing		7941.
64.0503 Marking devices	3953.		76.0204 Racing (including track operations)		7948.
64.0504 Carbon paper and inked ribbons	3955.		76.0205 Membership sports and recreation clubs		7997.
64.0600 Artificial trees and flowers	3962.		76.0206 Other amusement and recreation services		791, 799 (excl. 7997).
64.0701 Buttons	3963.		77 Health, educational, and social services and nonprofit organizations		
64.0702 Needles, pins, and fasteners	3964.		77.0100 Doctors and dentists		801-3, 8041.
64.0800 Brooms and brushes	3991.		77.0200 Hospitals		806.
64.0900 Hard surface floor coverings	3996.		77.0301 Nursing and personal care facilities		805.
64.1000 Burial caskets and vaults	3995.		77.0302 Other medical and health services, excluding nursing homes		074, 8049, 807-9.
64.1100 Signs and advertising displays	3993.		77.0401 Elementary and secondary schools		821.
64.1200 Manufacturing industries, n.e.c.	3999 (excl. 39996).		77.0402 Colleges, universities, and professional schools		822.
TRANSPORTATION, COMMUNICATIONS, AND UTILITIES			77.0403 Libraries, correspondence and vocational schools, and educational services, n.e.c.		823-9.
65 Transportation and warehousing²			77.0501 Business associations and professional membership organizations		861-2.
65.0100 Railroads and related services	40, 474, pt. 4789.		77.0502 Labor organizations and civic, social, and fraternal associations		863-4.
65.0200 Local and suburban transit and interurban highways passenger transportation	41.		77.0503 Religious organizations		866.
65.0300 Motor freight transportation and warehousing	42, pt. 4789.		77.0504 Other membership organizations		84, 865, 869, 8922, 6732.
65.0400 Water transportation	44.		77.0600 Job training and related services		8331.
65.0500 Air transportation	45.		77.0700 Child day care services		8351.
65.0600 Pipe lines, except natural gas	46.		77.0800 Residential care		8361.
65.0701 Freight forwarders and other transportation services	471, 4723, pt. 478.		77.0900 Social services, n.e.c.		8321, 8399.
65.0702 Arrangement of passenger transportation	4722.		GOVERNMENT ENTERPRISES		
66 Communications, except radio and TV			78 Federal Government enterprises		
66.0000 Communications, except radio and TV	48 (excl. 483).		78.0100 U.S. Postal Service		4311.
67 Radio and TV broadcasting			78.0200 Federal electric utilities		pt. 491.
67.0000 Radio and TV broadcasting	483.		78.0300 Commodity Credit Corporation		pt. 613.
68 Electric, gas, water, and sanitary services²			78.0400 Other Federal Government enterprises		several. ³
68.0100 Electric services (utilities)	491, pt. 493.		79 State and local government enterprises		
68.0200 Gas production and distribution (utilities)	492, pt. 493.		79.0100 Local government passenger transit		pt. 41.
68.0301 Water supply and sewerage systems	494, 4952.		79.0200 State and local electric utilities		pt. 491.
68.0302 Sanitary services, steam supply, and irrigation systems	495 (excl. 4952), 496-7, pt. 493.		79.0300 Other State and local government enterprises		several. ³
WHOLESALE AND RETAIL TRADE			70 Finance and insurance²		
69 Wholesale and retail trade			70.0100 Banking		60.
69.0100 Wholesale trade	50, 51.		FINANCE, INSURANCE, AND REAL ESTATE		
69.0200 Retail trade	52-7, 59, 7396, 8042.		70 Finance and insurance²		
FINANCE, INSURANCE, AND REAL ESTATE			70 Finance and insurance²		
70 Finance and insurance²			70 Finance and insurance²		
70.0100 Banking	60.		70 Finance and insurance²

90 Property-type income		99.3004 State and local government purchases, other commerce and transportation.....	
90.0000 Profit-type income, net interest, and capital consumption allowances.....		99.3005 State and local government purchases, gas and electric utilities.....	
91 Personal consumption expenditures		99.3006 State and local government purchases, water.....	
91.0000 Personal consumption expenditures.....		99.3007 State and local government purchases, urban renewal and community facilities.....	
92 Gross private fixed investment		99.3008 State and local government purchases, natural and agricul- tural resources and recreation.....	
92.0000 Gross private fixed investment.....		99.3009 State and local government purchases, other general gov- ernment.....	
93 Change in business inventories			
93.0000 Change in business inventories.....		OTHER SYMBOLS	
94 Exports		Outputs	
94.0000 Exports.....		T.I.U. Total intermediate use.....	
		T.F.D. Total final demand.....	
		T.C.O. Total commodity output.....	
		Inputs	
		T.I.I. Total intermediate inputs.....	
		V.A. Value added.....	
		T.I.O. Total industry output.....	

1. The industry classification is usually identical with that for the commodity that is the primary product of the industry. However, for some industries, the primary product, or a component thereof, is the same as the primary product of another industry. In such cases, commodity output is included with the industry most definitively associated with the commodity, usually the largest producer.

2. Excluding government enterprises.

3. In the 1977 SIC, government enterprise activities are generally classified with the similar private activity. In I-O, activities of enterprises are classified in groups 78 and 79 and the corresponding SIC's are shown except for 78.0400 and 79.0300, each of which includes a number of SIC's and several activities for which no comparable SIC exists.

NOTE.—This table originally appeared as appendix 8 in Interindustry Economics Division (BEA), "The Input-Output Structure of the U.S. Economy, 1977," Survey of Current Business, May 1984.

**Appendix D. Industry Aggregations for Which Multipliers Are
Available (one table)**

**Table D.--List of Industry Aggregations for Which
Multipliers Are Available**

Numerical designation of industry aggregation	Industry aggregation	Numerical designation of component detailed industries/1/
Agriculture, forestry, and fisheries:		
1.....	Agricultural products and agricultural, forestry, and fishery services	1.0100 - 2.0702, 4.0001 - 4.0002
2.....	Forestry and fishery products	3.0001 - 3.0002
Mining:		
3.....	Coal mining	7.0000
4.....	Crude petroleum and natural gas	8.0000
5.....	Miscellaneous mining	5.0000, 6.0100 - 6.0200, 9.0001 - 9.0004, 10.0000
Construction:		
6.....	New construction	11.0101 - 11.0704
7.....	Maintenance and repair construction	12.0100 - 12.0216
Manufacturing:		
8.....	Food and kindred products and tobacco	14.0101 - 15.0200
9.....	Textile mill products	16.0100 - 18.0300
10.....	Apparel	18.0400 - 19.0306
11.....	Paper and allied products	24.0100 - 25.0000
12.....	Printing and publishing	26.0100 - 26.0805
13.....	Chemicals and petroleum refining	27.0100 - 31.0300
14.....	Rubber and leather products	32.0100 - 34.0305
15.....	Lumber and wood products and furniture	20.0100 - 23.0700
16.....	Stone, clay, and glass products	35.0100 - 36.2200
17.....	Primary metal industries	37.0101 - 38.1400
18.....	Fabricated metal products	13.0200, 13.0500 - 13.0700, 39.0100 - 42.1100
19.....	Machinery, except electrical	43.0100 - 52.0500
20.....	Electric and electronic equipment	53.0100 - 58.0500
21.....	Motor vehicles and equipment	59.0100 - 59.0302
22.....	Transportation equipment, except motor vehicles	13.0100, 13.0300, 60.0100 - 61.0700
23.....	Instruments and related products	62.0100 - 63.0300

**Table D.--List of Industry Aggregations for Which
Multipliers Are Available--Continued**

Numerical designation of industry aggregation	Industry aggregation	Numerical designation of component detailed industries/1/
24.....	Miscellaneous manufacturing industries	64.0101 - 64.1200
	Transportation, communication, and utilities:*	
25.....	Transportation	65.0100 - 65.0702, 78.0100, 79.0100
26.....	Communication	66.0000 - 67.0000
27.....	Electric, gas, water, and sanitary services	68.0100 - 68.0302, 78.0200, 79.0200
	Wholesale and retail trade:	
28.....	Wholesale trade	69.0100
29.....	Retail trade	69.0200
	Finance, insurance, and real estate:	
30.....	Finance	70.0100 - 70.0300
31.....	Insurance	70.0400 - 70.0500
32.....	Real estate	71.0100 - 71.0200
	Services:	
33.....	Hotels and lodging places and amusements	72.0100, 76.0100 - 76.0206
34.....	Personal services	72.0201 - 72.0300
35.....	Business services	73.0101 - 73.0303
36.....	Eating and drinking places	74.0000
37.....	Health services	77.0100 - 77.0302
38.....	Miscellaneous services	75.0001 - 75.0003, 77.0401 - 77.0900, 78.0400, 79.0300
39.....	Households	91.0000

* Includes government enterprises.

1. Appendix C identifies these industries.
